The author, a former public school teacher, argues that we need to make a fundamental shift in the way we think about public education. We need to move away from the current model, which is based on standardized testing and accountability, and towards a more holistic approach that focuses on the whole child.

The author outlines a comprehensive plan for restoring public education, including:

- Investing in early childhood education.

- Reducing class sizes.
- Increasing teacher pay.
- Providing more support for students with special needs.
- Creating more after-school and summer programs.
- Empowering teachers and giving them more autonomy.
- Reforming the way we assess students.
- Advocating for policies that support public education.

The author acknowledges that these changes will not be easy to make, but he argues that they are essential if we want to ensure that every child has access to a high-quality public education.

This book is a must-read for anyone who cares about the future of public education in America. It is a wake-up call that we cannot afford to ignore.
