Global Reconstructive Surgery, authored by renowned plastic surgeon Dr. James Chang, is an indispensable resource for surgeons seeking to expand their knowledge and skills in reconstructive surgery. This comprehensive guide provides a detailed overview of various techniques used to restore form and function to patients worldwide.

Key Features

- Comprehensive Coverage: Covers a wide range of reconstructive surgery topics, including microsurgery, craniofacial surgery, hand surgery, and burn surgery.
- International Perspective: Offers a global perspective on reconstructive surgery, incorporating best practices from surgeons around the world.

- Surgical Techniques: Provides step-by-step instructions on advanced surgical techniques, supported by high-quality illustrations.
- Patient Management: Includes guidelines for patient selection,
 preoperative planning, postoperative care, and rehabilitation.
- Case Studies: Presents real-world examples of successful reconstructive surgeries, showcasing different approaches and outcomes.

Sections

The book is organized into five main sections:

1. Basic Principles

This section covers the fundamental principles of reconstructive surgery, including wound healing, flap design, and microsurgical techniques.

2. Craniofacial Surgery

This section discusses reconstructive techniques for the head and neck, including cleft lip and palate repair, facial trauma repair, and skull base reconstruction.

3. Hand Surgery

This section covers reconstructive procedures for the hand and upper extremity, including nerve repair, tendon transfer, and pollicization.

4. Burn Surgery

This section focuses on the management of burn injuries, including wound care, skin grafting, and scar revision.

5. Microsurgery

This section provides a detailed guide to microsurgical techniques, including vessel anastomosis, flap elevation, and nerve repair.

Target Audience

Global Reconstructive Surgery is primarily intended for surgeons specializing in plastic, reconstructive, and microsurgery. However, it can also be a valuable resource for:

- Surgeons in training
- Medical students
- Nurses and other healthcare professionals involved in reconstructive surgery

About the Author

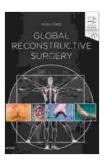

Dr. James Chang is a world-renowned plastic surgeon with over 30 years of experience in reconstructive surgery. He is the director of the Chang Aesthetic Surgery & Skin Center in San Francisco and clinical professor of surgery at Stanford University.

Global Reconstructive Surgery is an authoritative and comprehensive guide to the field of reconstructive surgery. It provides surgeons with the latest techniques, cutting-edge research, and best practices to enhance their skills and improve patient outcomes. This book is a must-have for any surgeon seeking to stay at the forefront of reconstructive surgery.
